Kelas: A
Mata Kuliah: PWEB

AKTIVITAS MANDIRI 1 - Instalasi & Setup Proyek Laravel

1. Instal XAMPP terbaru, pastikan PHP 8.2+ tersedia (cek: `php --version` di terminal)
Saya menggunakan laragon

```
C:\Users\admin>php --version
PHP 8.3.30 (cli) (built: Jan 13 2026 22:50:40) (ZTS Visual C++ 2019 x64)
Copyright (c) The PHP Group
Zend Engine v4.3.30, Copyright (c) Zend Technologies
```

2. Instal Composer dari getcomposer.org, verifikasi dengan: `composer --version`
Saya menggunakan laragon

```
C:\Users\admin>composer --version
Composer version 2.9.4 2026-01-22 14:08:50
PHP version 8.3.30 (D:\laragon\bin\php\php-8.3.30-Win32-vs16-x64\php.exe)
Run the "diagnose" command to get more detailed diagnostics output.
```

3. Buat proyek Laravel baru: `composer create-project laravel/laravel` `siak-app`

```
C:\Users\admin>composer create-project laravel/laravel SECONDCHANCE-app
Creating a "laravel/laravel" project at "./SECONDCHANCE-app"
Installing laravel/laravel (v13.3.0)
- Installing laravel/laravel (v13.3.0): Extracting archive
Created project in C:\Users\admin\SECONDCHANCE-app
> @php -r "file_exists('.env') || copy('.env.example', '.env');"
Loading composer repositories with package information
Updating dependencies
Lock file operations: 107 installs, 0 updates, 0 removals
- Locking brick/math (0.14.8)
- Locking carbonphp/carbon-doctrine-types (3.2.0)
- Locking dflydev/dot-access-data (v3.0.3)
- Locking doctrine/inflector (2.1.0)
- Locking doctrine/lexer (3.0.1)
- Locking dragonmantank/cron-expression (v3.6.0)
- Installing phpunit/phpunit (12.5.23): Extracting archive
60 package suggestions were added by new dependencies, use 'composer suggest' to see details.
Generating optimized autoload files
> illuminate\Foundation\ComposerScripts:postAutoloadDump
> @php artisan package:discover --ansi

 INFO  Discovering packages.

laravel/tinker ..... DONE
nesbot/carbon ..... DONE
nunomaduro/collision ..... DONE
nunomaduro/termwind ..... DONE

78 packages you are using are looking for funding.
Use the 'composer fund' command to find out more!
> @php artisan vendor:publish --tag=laravel-assets --ansi --force

 INFO  No publishable resources for tag [laravel-assets].

No security vulnerability advisories found.
> @php artisan key:generate --ansi

 INFO  Application key set successfully.

> @php -r "file_exists('database/database.sqlite') || touch('database/database.sqlite');"
> @php artisan migrate --graceful --ansi

 INFO  Preparing database.

Creating migration table ..... 18.35ms DONE

 INFO  Running migrations.

0001_01_01_000000_create_users_table ..... 38.96ms DONE
0001_01_01_000001_create_cache_table ..... 31.14ms DONE
0001_01_01_000002_create_jobs_table ..... 28.52ms DONE
```

4. Buat database baru 'siak_db' di phpMyAdmin

5. Konfigurasi file .env: isi DB_DATABASE, DB_USERNAME, DB_PASSWORD sesuai lokal

```
DB_CONNECTION=mysql
# DB_HOST=127.0.0.1
DB_PORT=3307
DB_DATABASE=secondchance_db
DB_USERNAME=root
DB_PASSWORD=
```

6. Jalankan: php artisan key:generate

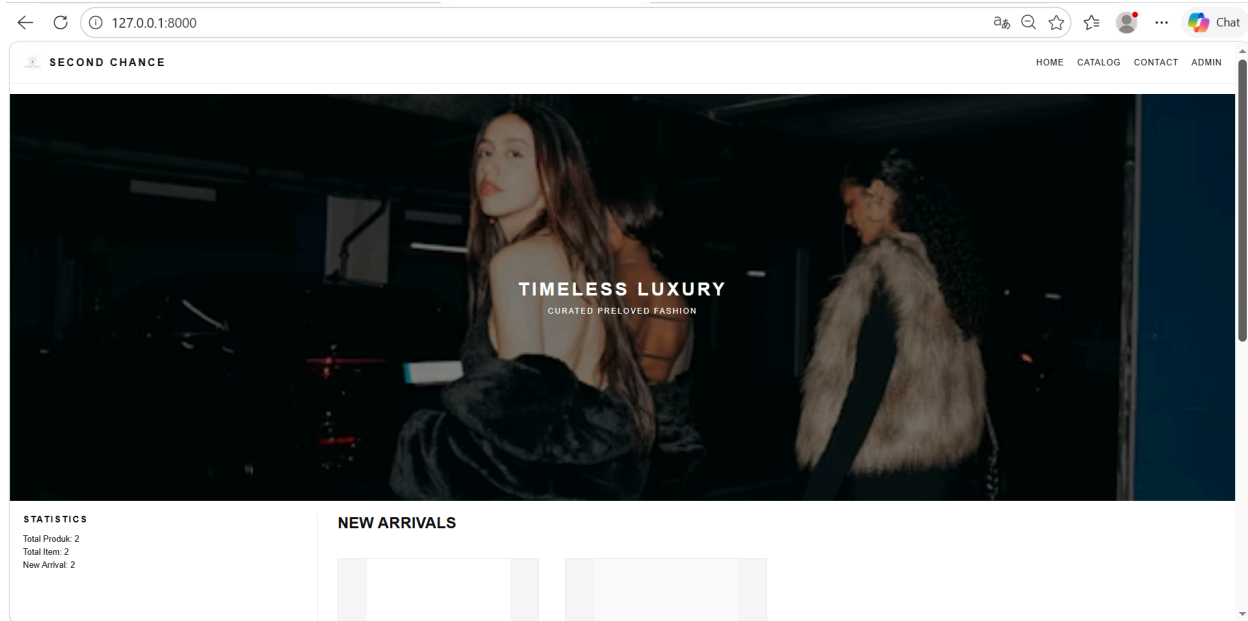

```
PS C:\laragon\www\SecondChance-app> php artisan key:generate

INFO Application key set successfully.
```

7. Jalankan server: php artisan serve - buka http://127.0.0.1:8000 di browser

```
PS C:\laragon\www\SecondChance-app> php artisan serve

INFO Server running on [http://127.0.0.1:8000].
```

8. Eksplorasi struktur folder, buka setiap folder dan pahami fungsinya
9. Jalankan php artisan route:list dan catat route apa saja yang sudah terdaftar

```
PS C:\laragon\www\SecondChance-app> php artisan route:list

GET|HEAD / ..... dashboard > DashboardController@index
GET|HEAD admin ..... admin > DashboardController@admin
DELETE admin/delete/{id} admin.delete > DashboardControll...
GET|HEAD admin/edit/{id} admin.edit > DashboardController@a...
POST admin/store admin.store > DashboardController@store
POST admin/update/{id} admin.update > DashboardControll...
GET|HEAD dashboard ... dashboard > DashboardController@index
GET|HEAD detail/{id} ... detail > DashboardController@detail
GET|HEAD hitung/{a}/{b} ..... routes/web.php:20
GET|HEAD katalog ..... katalog > DashboardController@katalog
GET|HEAD storage/{path} storage.local > vendor/laravel/fram...
PUT storage/{path} storage.local.upload > vendor/larav...
GET|HEAD tentang ..... tentang
GET|HEAD up vendor/laravel/framework/src/Illuminate/Foundat...

Showing [14] routes
```

Tips: Gunakan Laragon (laragon.net) sebagai alternatif XAMPP - lebih ringan dan mendukung Laravel secara native dengan virtual host otomatis.

AKTIVITAS MANDIRI 2 - Membuat Routing & Controller Dashboard

1. Buat Controller DashboardController: `php artisan make:controller DashboardController`

```
PS C:\laragon\www\SecondChance-app> php artisan make:controller
DashboardController
```

2. Tambahkan method index() yang mengembalikan view('dashboard') di DashboardController

```

class DashboardController extends Controller
{
    public function index()
    {
        $produk = DB::table('products')
            ->orderBy('tanggal_masuk', 'desc')
            ->get();

        $totalProduk = $produk->count();
        $totalItem = $produk->sum('stok');
        $newArrival = $produk->take(6)->count();

        return view('dashboard', compact('produk', 'totalProduk', 'totalItem', 'newArrival'));
    }
}

```

3. Daftarkan route di routes/web.php: Route::get('/dashboard', [DashboardController::class, 'index']->name('dashboard'))

```

<?php

use Illuminate\Support\Facades\Route;
use App\Http\Controllers\DashboardController;

Route::get('/', [DashboardController::class, 'index']->name('dashboard'));
Route::get('/dashboard', [DashboardController::class, 'index']->name('dashboard'));

Route::get('/katalog', [DashboardController::class, 'katalog']->name('katalog'));

Route::get('/detail/{id}', [DashboardController::class, 'detail']->name('detail'));

Route::view('/tentang', 'tentang')->name('tentang');

Route::get('/admin', [DashboardController::class, 'admin']->name('admin'));
Route::get('/admin/edit/{id}', [DashboardController::class, 'adminEdit']->name('admin.edit'));
Route::post('/admin/store', [DashboardController::class, 'store']->name('admin.store'));
Route::post('/admin/update/{id}', [DashboardController::class, 'update']->name('admin.update'));
Route::delete('/admin/delete/{id}', [DashboardController::class, 'delete']->name('admin.delete'));
Route::get('/hitung/{a}/{b}', function ($a, $b) {
    return $a + $b;
});

```

4. Buat file view sementara resources/views/dashboard.blade.php berisi '<h1>Dashboard SIAK</h1>'

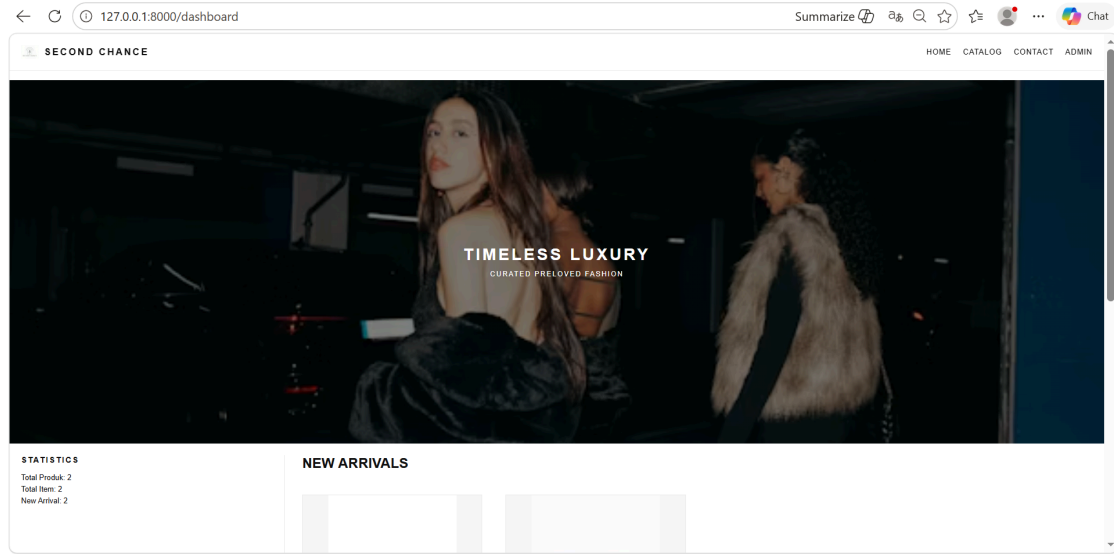

```

1 <!DOCTYPE html>
2 <html lang="id">
3 <head>
4 <meta charset="UTF-8">
5 <meta name="viewport" content="width=device-width, initial-scale=1.0">
6 <title>SECOND CHANCE</title>
7 <link rel="stylesheet" href="{{ asset('style.css') }}">
8 </head>
9 <body>
10
11 <header>
12 <div class="nav-container">
13 <div class="logo">
14 
15 <h1>SECOND CHANCE</h1>
16 </div>
17 <nav>
18 <a href="{{ route('dashboard') }}">HOME</a>
19 <a href="{{ route('katalog') }}">CATALOG</a>
20 <a href="https://wa.me/620000000000" target="_blank">CONTACT</a>
21 <a href="{{ route('admin') }}">ADMIN</a>
22 </nav>
23 </div>

```

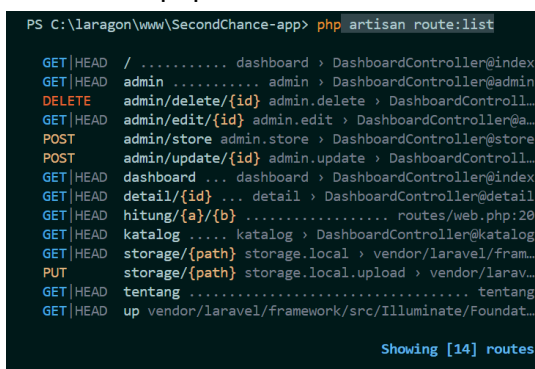

5. Akses http://127.0.0.1:8000/dashboard di browser - pastikan tampil

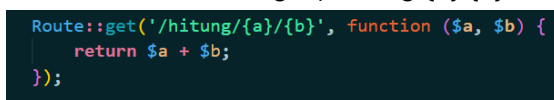

6. Buat route /tentang dengan Route::view('/tentang', 'tentang') dan buat view-nya

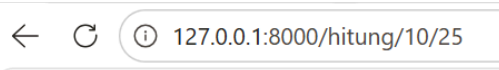

7. Jalankan php artisan route:list - amati semua route yang terdaftar

8. Coba buat Route::get('/hitung/{a}/{b}', fn(\$a, \$b) => \$a + \$b) dan akses /hitung/10/25

35

Tips: `Route::view()` adalah shortcut untuk route yang hanya menampilkan view tanpa logika. Sangat berguna untuk halaman statis seperti 'Tentang Kami'.
